

Introducing Saint John mechanical vintage collectables...
Just wind them up and watch them go!

At last! The perfect gift for the nostalgic and young-at-heart. **Saint John** is a range of high-quality, vintage-style collectables created by classic toy and gift company, Marxu International.

Perfect for the nostalgic grown-up in your life, each mechanical wind-up tin robot, golf player and aeroplane harks back to the tin toys so popular during the 1930s and 1960s and is made in the traditional way.

But don't be fooled, due to the complexity of their design these aren't children's toys and are intended for collectors of fourteen years of age and above.

Border Fine Arts is launching their first selection of these zany robots and acrobatic aeroplanes in their January 2016 Contemporary Gift Collection, and among the highlights is the irresistible **V2 Space Dog** (pictured) who flaps his ears, wobbles his eyes, and opens his mouth as he waddles along.

Each individual design comes in its own colourful, bespoke, retro-design box.
